Install OpenHab2 Hue Emulation

The screenshot displays the OpenHAB2 web interface. On the left, a sidebar contains navigation links: Control, Inbox, Configuration, Add-ons (highlighted with a red '1'), and Preferences. The main area is titled 'Add-ons' and features a horizontal tab bar with categories: ACTIONS, BINDINGS, MISC (highlighted with a red '2'), PERSISTENCE, TRANSFORMATIONS, USER INTERFACES, and VOICE. Below the tabs, a list of add-ons is shown. The 'Hue Emulation' add-on, identified by a circular icon with the letter 'H' and the text 'misc-hueemulation - 2.3.0', is highlighted with a red '3' and has an 'INSTALL' button next to it. Other add-ons include 'Google Calendar Scheduler' (misc-gcal1 - 1.12.0), 'HomeKit Integration' (misc-homekit - 2.3.0), 'ImperiHome Integration' (misc-imperihome - 2.3.0), and 'openHAB Cloud Connector' (misc-openhabcloud - 2.3.0), each with its own 'INSTALL' button. The 'openHAB Cloud Connector' also has a 'UNINSTALL' button. The bottom of the sidebar shows a 'Paper UI' link.

Add-on Name	Version	Action
Google Calendar Scheduler	misc-gcal1 - 1.12.0	INSTALL
HomeKit Integration	misc-homekit - 2.3.0	INSTALL
Hue Emulation	misc-hueemulation - 2.3.0	INSTALL
ImperiHome Integration	misc-imperihome - 2.3.0	INSTALL
openHAB Cloud Connector	misc-openhabcloud - 2.3.0	UNINSTALL

Check if OpenHab2 Hue has installed

The screenshot displays the OpenHAB2 web interface. On the left, a sidebar contains navigation links: Control, Inbox, Configuration, Add-ons (highlighted), and Preferences. The main area is titled 'Add-ons' and features a tabbed interface with categories: ACTIONS, BINDINGS, MISC (selected), PERSISTENCE, and TRANSFORMATIONS. A list of add-ons is shown under the MISC tab, including HomeKit Integration, Hue Emulation, ImperiHome Integration, and openHAB Cloud Connector. The 'Hue Emulation' add-on is highlighted with a red arrow, indicating it is the focus of the check.

Category	Add-on Name	Version
MISC	misc-gear	1.12.0
MISC	HomeKit Integration	misc-homekit - 2.3.0
MISC	Hue Emulation	misc-hueemulation - 2.3.0
MISC	ImperiHome Integration	misc-imperihome - 2.3.0
MISC	openHAB Cloud Connector	misc-openhabcloud - 2.3.0

Enable Device Pairing

Pairing Enabled

Pairing must be enabled to connect a new device. Once a device has been added, pairing should be disabled.

Optional discovery address

If your host has multiple IP addresses you may specify the IP you would like to advertise in the UPNP discovery process. You may safely leave this empty on most systems.
